CAPPA Eagle license guide

Windows · v1.0.97

1. **Open licensing**
   Click the CAPPA logo and choose Enter / Renew License. For automatic payment, use the Subscription / payment tab.

2. **Select wallets and duration**
   Review the wallets included. The × removes a wallet only from this invoice. Up to 200 wallets per device can be licensed. Choose 30, 60, 90, 120, 150 or 180 days. Each wallet can have up to 180 days remaining in total. The selected wallet levels are verified to prepare the amount.

3. **Send the amount**
   Choose NACKL or SHELL and prepare the payment. Send the exact amount, including both decimals, to the recipient shown in the app within five minutes. Use the selected currency and keep the decimals as displayed.

4. **Check payment**
   Select Check payment. Confirmation can take about 10 minutes or longer if the network is delayed. Payments sent in time remain checkable after the countdown ends. Send the amount only once. Start mining after the license has been applied.

5. **Manual license code**
   If you have a manual code, enter it in the License code tab. To link an older code to automatic renewal, follow the app prompt and load exactly the wallets covered by the code in the specified quantity.
